# Connected Communities are Healthy Communities

CyncHealth

CyncHealth, a public health data utility, helps hospitals improve patient outcomes and reduce unnecessary costs by supporting care teams in providing whole person care.

Take value-based patient care to the next level

Healthy communities need thriving hospitals, supported care teams, and access to their medical records.

Avoid negative Merit-Based Incentive Payment System (MIPS) adjustments

Reduce unnecessary costs and protect your hospital's financial solvency

Reduce administrative burden on clinicians and other hospital staff

Improve patient outcomes and empower patients to actively participate in their own care

"[CyncHealth] has been a godsend for me because I have a lot of elderly patients who can't remember who they saw or where they have their scan or which system they used for this. And I can… see who they saw and what they found out and what their imaging showed. I use it on almost every patient I see."

— Richard G. Belatti, MD, Medical Pain Center, PC
Omaha, NE

CyncHealth

5 million connected lives across the Midwest—and counting

CyncHealth is the powerful connector that allows you to do what you do best: **care for your community.**

Respond to at-risk patients in their time of need

CyncHealth's Event Notification Services and Care Coordination technology — powered by Collective Medical — helps providers fulfill the CMS mandate of sending admission, discharge, and transfer (ADT) notifications in near real-time.

Create a seamless and cost-effective patient experience for LTPACs

CyncHealth's LTPAC integration capability, powered by PointClickCare, supports Long-term Post-Acute Care Providers (LTPACs) by providing longitudinal clinical information, enabling smooth transitions of care, improving time and cost savings, and offsetting connection fees through available funds.

Meaningfully address social determinants of health

Enhance care coordination and delivery through a powerful, multi-state electronic referral network created in partnership with Unite Us. Health and social service care providers communicate and track outcomes together and ensure patients are connected to the best program to address their needs—from food, housing and transportation to mental health supports, state benefits, and employment services.

A health data utility, built for how your clinicians practice medicine

Better care for patients with instant access to comprehensive and longitudinal health history, including patient encounter-level reports, diagnostic history, allergies, immunizations, and laboratory results from participating facilities across the continuum of care.

Community-powered care for the common good

QCDR   NCQA   HITRUST

CyncHealth, a 501(c)(3) organization, is a public health data utility that gives healthcare organizations the power to connect the dots across all points of patient care. It's more than sharing data between providers—CyncHealth empowers patients and their care teams to work together for better health outcomes, lower costs, and thriving communities.

Let's achieve our shared goal of healthier communities - together.
