

A seamless and cost-effective patient experience for LTPACs

CyncHealth's LTPAC integration capability, powered by PointClickCare, supports Long-term Post-Acute Care Providers (LTPACs) by providing longitudinal clinical information, enabling smooth transitions of care, improving time and cost savings, and offsetting connection fees through available funds.

Whole patient data for whole patient care

CyncHealth's public health data utility integrates with LTPAC software, giving providers access to a comprehensive overview of a patient's journey through the healthcare ecosystem.

Longitudinal medical records include:

- Patient encounter-level reports
- Diagnostic history
- Allergies
- Immunizations
- Laboratory results
- Other clinical data from the patient's healthcare journey

Save time and money without compromising care quality

- Effective care coordination
- Improved workflow efficiencies
- Reduced administrative burden
- Potential cost savings from unnecessary repeat testing
- More accurate capture of severity and complexity of illness, which can result in comprehensive coding to support patient-driven payment models (PDPM).

.....

The right information at the point of care—*every time*

- Improve communication among providers by ensuring care teams have the right information at the point of care.
- The more patient information a provider has, the more effectively he or she can treat the individual – resulting in smooth transitions of care that cater to the patient's needs and ensure a seamless – and cost-effective – patient experience.

Public health emergency connections to CyncHealth will be at no cost to facilities, providers, or labs. The funding identified by the Nebraska Department of Health and Human Services (DHHS) and CyncHealth will expire on September 30, 2021.
